Goal of the Curriculum: To provide graduates with the knowledge, professional skills, attitudes and behaviors necessary to address the pharmacy-related needs of society and to promote advocacy and leadership in the profession.

Educational Outcomes: The following program-level, ability-based outcomes define the knowledge, skills, attitudes and behaviors that a graduate must achieve upon completing the Doctor of Pharmacy Curriculum.

1. Prepare and dispense medications: Assure safe and accurate preparation, dispensing and administration of medications.

2. Provide patient-centered care: Design, implement, monitor, evaluate, and adjust pharmaceutical care plans that are patient-specific and evidence-based to optimize therapeutic outcomes.

4. Promote health, wellness, and disease prevention: Collaborate with patients, communities, at-risk populations, stakeholders and interprofessional health care providers to promote wellbeing.

5. Manage and use resources of the health care system: Manage pharmacy operations that efficiently utilize personnel, physical inventory, information systems, and clinical expertise to deliver services and medications safely in accordance with pharmacy laws and regulations, including practices and goals of specific organizations.

6. Communicate and collaborate: Effectively communicate with and educate patients, care givers, healthcare providers, and other stakeholders in support of a shared decision-making approach to improve patient outcomes.

7. Exhibit and maintain professional and ethical competence: Perform pharmacy duties in accordance with legal, ethical, social, economic and professional guidelines; maintain professional competence by anticipating, identifying and analyzing emerging issues, technologies, products, policies and services that may impact patient care or health care resource management.
